

# T.V. CHANNEL 3 IN DANGER

The Federal Communications Commission proposes to remove Channel 3 from Hartford and substitute for it Channel 76, a ~~VHF~~ channel with a much more restricted range than the VHF Channel 3. It would restrict the broadcasts to about a 20-mile range and would cost you around \$40.00 for a convertor. Channel 3 is a real service to Connecticut Grangers and we propose to do all possible to save it. This problem has confronted many section of our country and the National and State Granges have been very prominent in battling this restriction of our local stations. Your State Grange Executive Committee will take immediate and aggressive action.
